Profile

Second-year BSc (Hons) Data Science and Artificial Intelligence student at Bournemouth University, with AWS certification and software internship experience. Builds AI applications and documented ML experiments using AI-assisted tools, alongside Python-based analysis and English-language technical writing.

Education

Bournemouth University

BSc (Hons) Data Science and Artificial Intelligence | In progress, second year

- Practical ML work includes data preparation, regression and model evaluation, with participant-level train/test separation and training-only preprocessing on a synthetic longitudinal dataset.

FMV Ayazağa Işık High School, Istanbul | 2020–2025

Artificial Intelligence summer programme — Immerse Education, Cambridge | Two weeks, 2024

Competition Achievement

AWS DeepRacer Student League — Team third place

MOD Corsham | Bournemouth University | 10 November 2025

- Held technical responsibility for the team's vehicle and gained practical experience with reinforcement learning (RL).

Selected Certifications and Training

AWS Certified Solutions Architect – Associate | 2026

AWS Certified AI Practitioner | 2026

Machine Learning Specialization | Stanford Online & DeepLearning.AI, Coursera | 2025

All three courses completed.

MLOps Fundamentals Track | DataCamp | 2026

Experience

Software Intern | SNI

2024

- Supported a Java development team in an SAP-based software environment, contributing to small development tasks and following team development processes.

Independent Technical Writer and Editor | Medium publications

2025–present

- Write English-language AI and software analysis for Data Science Collective, Towards AI and Level Up Coding; publication editing experience with Technology Core.
- Examine research claims and experimental limits using primary sources, combining AI-assisted research and drafting with editorial review.

Selected Projects

Prompt Compiler

Python, FastAPI, React | Personal project, AI-assisted development

- Developed a tool that turns natural-language requests into structured prompts, execution plans and policy checks, with an offline, deterministic core.
- Added pull-request readiness guidance and workflows for reviewing generated outputs, supported by automated regression tests and documentation.

github.com/madara88645/Compiler

SpacingLab

Python, PyTorch, GPT-2 | Personal experimental research project

- Investigated repetition timing and selective replay during GPT-2 fine-tuning through a series of laptop-scale experiments with AI coding agents.
- Used documented experiment plans, matched training budgets and multiple random seeds; documented raw results, negative findings and limits to causal interpretation.

github.com/madara88645/SpacingLab

NeurIQ

React, Node.js, PostgreSQL, Prisma, FastAPI | Personal learning platform

- Combined course-material uploads, quizzes, spaced-repetition flashcards, AI tutoring, Feynman-style explanations and knowledge maps in a single learning workspace.

neuriq-ai.com

VibeGraph

Python, FastAPI, React, tree-sitter | Personal code-exploration tool

- Developed a tool that turns Python, JavaScript and TypeScript code into interactive call graphs, with function-level AI explanations and contextual code chat.

github.com/madara88645/VibeGraph

ScrubLab

SwiftUI, Swift Charts, Python, scikit-learn | Personal macOS application

- Created an offline machine learning playground with guided tasks for exploring datasets, visualising relationships and comparing models.
- Connected a native macOS interface to a scikit-learn engine with training-only preprocessing, duplicate-safe data splits and notebook exports.

Technical Skills

Data and machine learning: Python, pandas, NumPy, scikit-learn, PyTorch, Jupyter; exploratory analysis, regression, classification and train/test validation.

Project technologies: JavaScript/TypeScript, React, FastAPI, Node.js, PostgreSQL, Prisma, SwiftUI; Java internship experience.

Development workflow: Git, GitHub, automated tests, Docker and CI workflows; AI coding tools including Codex, Claude Code and Cursor.

Research and communication: primary-source research, experiment documentation, technical editing, data visualisation and English-language articles.

Selected Writing

Building a project with AI is easy now. Making it trustworthy is not | Level Up Coding

How Anthropic's Claude Discovered the ART Enzyme System (and Failed 10 Reruns) | Towards AI

Languages

Turkish: native | English: academic study and technical writing
